Exigo Management Tool

Installing EMT

To install the **Exigo Management Tool** on your PC:

- Download the latest version of the Exigo Management Tool (EMT): Downloads
- Double-click the setup file for the program

Click Next

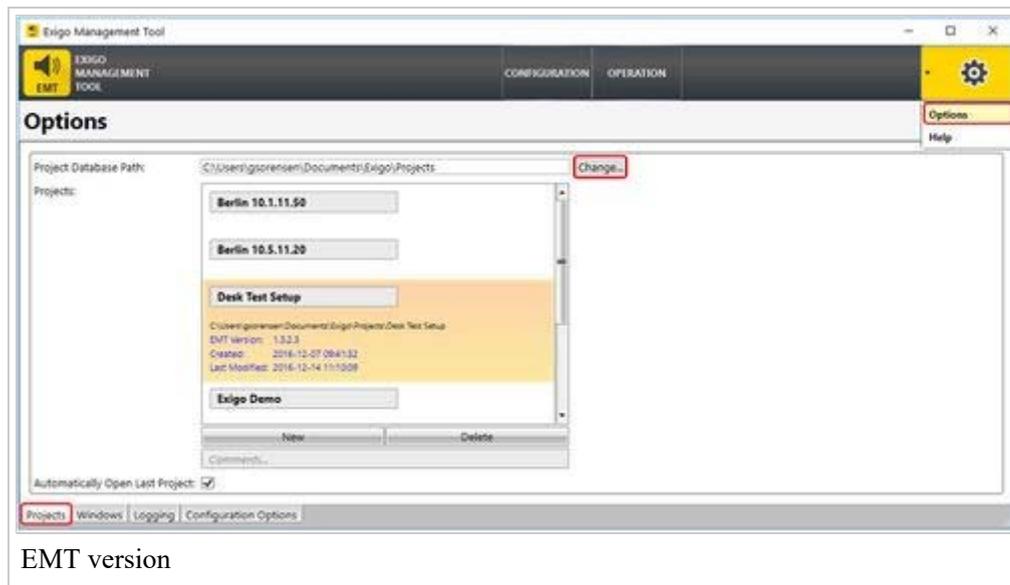

- Click **Next** and **Accept** the EULA
- Follow the instructions in the InstallShield wizard until completion

After installation, all project database files will be stored on the hard disk under: **/Documents/Exigo/Projects/**.

EMT Options

Project Database Path

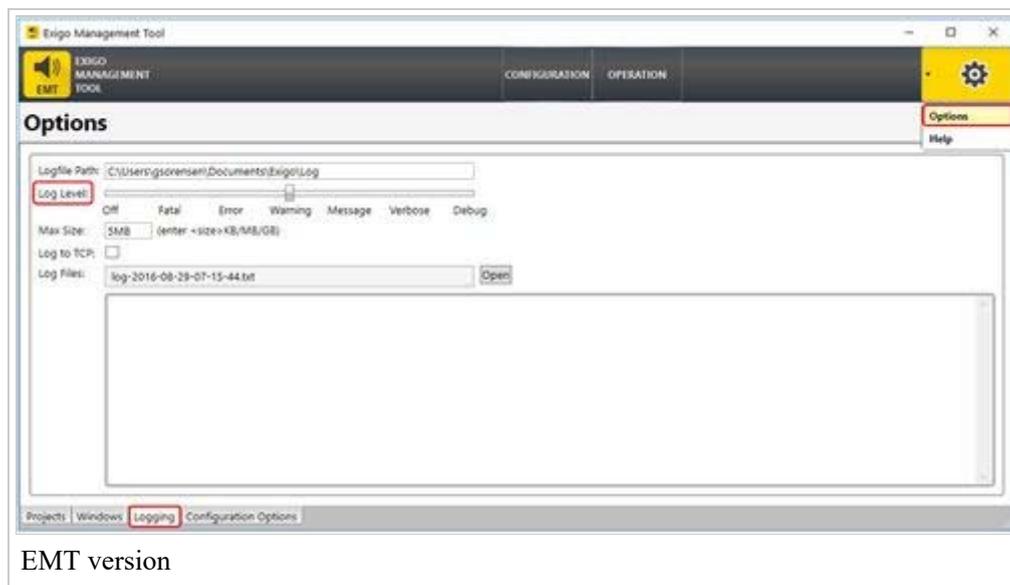

The default setting for storing databases is: **C:\Users\'your_name'\Documents\Exigo\Projects**
This can be changed by pressing the gears symbol on top right and select options:

Select the **Projects** tab in the bottom left. Here it is possible to change the **Project Database Path**.

Logging

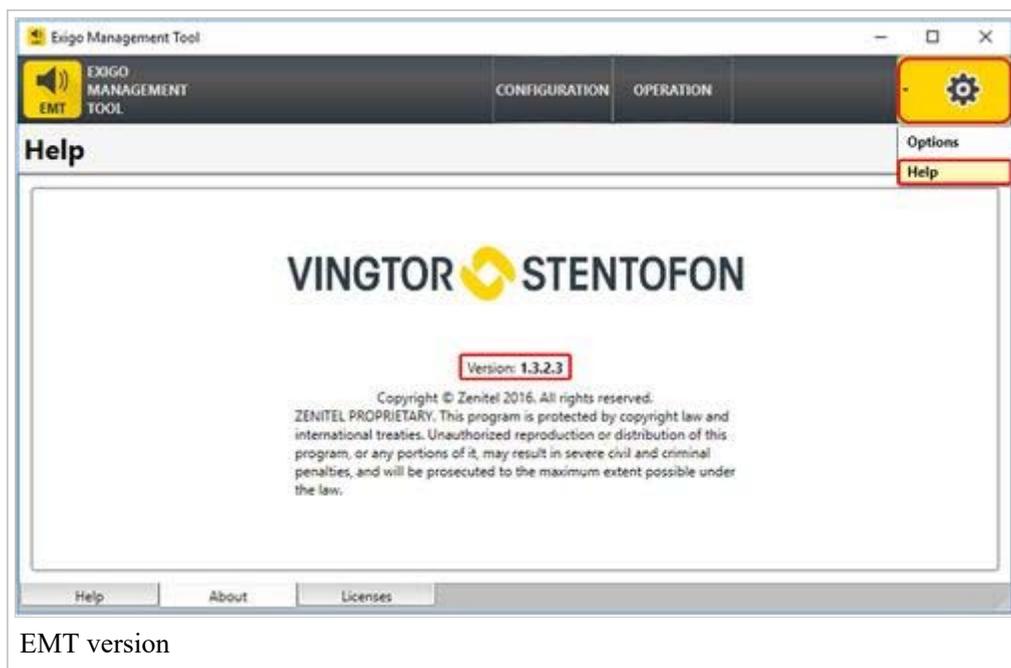

For debugging of Exigo Management Tool you need to change the logging.
This is done by pressing the gears symbol on top right and select options:

Select the **Logging** tab in the bottom left.
Slide the **Log Level** slider all the way to the right (**Debug**).

EMT version

To check the EMT version click on the gear button (top left) -> Help

EMT version
